Subject Lower Silver Creek Sampling

Kathryn - We collected following samples from lower silver creek site this week.

Total metals 23 water samples

Dissolved metals 23 water samples

Sediment 23 samples

Sampling went fine over all. We used Forms to light program for CLP chain of custody and documentation. All samples were shipped to CLP lab today. UPCM installed four piezometers and Kari Lundeen is in the process of installing additional piezometers. These piezometers will be ready for sampling in spring.

Thanks

Mo
